Subject: Sutter - Castro Valley

Dear Bill:

I wanted to send a quick thank you for the great work at the Sutter Castro Valley Project.

It is my understanding that your MES 100 system worked well throughout the Main Hospital, and the final finish gave a smooth palate for the resilient floors.

The Vapor Seal 309 system that was used in the MOB worked exactly as you had indicated. The three floors with 309 hit the required moisture requirements with the exception of some minor areas that your moisture testing determined would require the MES 100. The 309 also resulted in a significant schedule savings.

The second floor where we, unfortunately in hindsight, decided not to use the 309 required MES 100 throughout to correct the moisture emissions. While we were able to recover the 2nd floor schedule impact, using the Vapor Seal 309 would have ultimately saved us time, money and resulted in a less congested work area on the 2nd floor.

I am certainly a believer in your products and intend to suggest their use on future projects.

Thank you,
Rick Bell
