

PowerPump

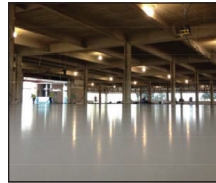

**San Francisco General Hospital**  
Completed 2013 in San Francisco, CA

**Owner:** S.F. Dept. of Public Works  
**Contractor:** Webcor Builders  
**Architect:** Fong & Chan Architects  
**Scope:** 368,000 sq. ft.

*"All nine floors of the new hospital were moisture sealed and pumped with a hydraulic cement topping, on time and without incident. Installing the sealer and floor levelers... began on each floor immediately after structural slabs were poured and saved weeks off our interiors schedule. Your Power Pump System poured over 40,000 square feet in a day, completing entire floors very quickly. Webcor will not hesitate to use your Power Pump System again."*

**Spencer Sayles I** Project Manager,  
Webcor Builders, SFGH Rebuild

**Kaiser Carson Medical Offices Building (M.O.B.)**  
Completed 2012 in Carson, CA

**Owner:** Kaiser Permanente  
**Contractor:** Turner Construction  
**Architect:** Langdon Wilson  
**Scope:** 74,381 sq. ft.

*"I wanted to let you know how well the Floor Seal Technology PowerPump System worked at our Kaiser Carson project. Nearly 50,000 square feet was blasted, primed with your crack suppression system and topped with self-leveling cement. Your team overcame every obstacle and completed your work on schedule. We are recommending and intend to use the same system on our next project."*

**Ed Kustanovich I** Senior Project  
Superintendent, Turner Construction Company

VaporSeal 309

**Kaiser Cancer Treatment Center**  
Completed 2011 in South San Francisco, CA

**Owner:** Kaiser Permanente  
**Contractor:** Rudolph & Sletten  
**Flooring Contractor:** Welker Bros.  
**Architect:** N/A  
**Scope:** 20,657 sq. ft.

*"Thank you again for the quality and effectiveness of your team and the VaporSeal 309. We found no cracks anywhere on all three floors of the project. There was very little prep due to the quality of the concrete that your curing and sealing product produced. The floors [at Kaiser San Mateo] turned out perfect, as they did on the South San Francisco Cancer Treatment Center."*

**Larry Fabricant I** Welker Bros.

**Sutter Hospital Castro Valley**  
Completed 2013 in Castro Valley, CA

**Owner:** Sutter Health Network  
**Contractor:** DPR Construction  
**Architect:** Devenney Group  
**Scope:** 195,568 sq. ft.

*"Your MES 100 system worked well throughout the main hospital, and the final finish gave a smooth pallet for the resilient floors. The VaporSeal 309 system hit the required moisture requirements [and] resulted in a significant schedule savings. I am certainly a believer in your products and intend to suggest their use on future projects."*

**Rick Bell I** DPR Construction

MES 100

**Kaiser Anaheim Hospital Replacement**  
Completed 2011 in Anaheim, CA

**Owner:** Kaiser Permanente  
**Contractor:** The M.S. Rouse Company, Inc.  
**Scope:** 461,000 sq. ft.

*"The MES 100 system installed at the Kaiser of Anaheim was done with the highest level of quality. The cement finish applied by your installers provided a very good surface for the installation of the specified floor. Therefore, I would like to thank you for the work you provided in such a critical project, which was completed in a timely manner."*

**Jeffrey Lasher I** COO  
The M.S. Rouse Company, Inc.

**Kaiser Santa Rosa Hospital Expansion**  
Completed 2008 in Santa Rosa, CA

**Owner:** Kaiser Permanente  
**Contractor:** HMH Builders, Inc.  
**Architect:** TLCD Architecture  
**Scope:** 30,000 sq. ft.

*"An underground water main burst, flooding our construction site, and eventually flooding the entire 30,000sf basement of the operating hospital. We want to express our sincere appreciation to Floor Seal Technology, Inc. for your assistance in our time of need. Within hours, our efforts to mobilize, move out, clean-up, and rebuild the facility were fully staffed."*

**Curtis F. Johnson I** Vice President, Operations  
Manager, HMH Builders, Inc.
